HazCom / GHS

Safety Training Handout

Chemical exposure *can cause serious health effects. Some chemicals can even cause fires or explosions.*

The Hazard Communication Standard *ensures that the hazards of all chemicals are classified, and that the information concerning the hazards are transmitted to both the employers and employees*

Pictograms

Smart Safety Rules

- Know what chemicals you are working with and understand the hazards!
- Read the safety data sheets (SDS)
- Read product labels on containers
- Know where the SDS' are kept at each workplace
- Ensure secondary containers are labelled appropriately
